Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, Merit Medical Systems, Inc. (the "Company") is filing a Conflict Minerals Report for calendar year 2015. A copy of the report is filed as Exhibit 1.01 hereto and is publicly available at www.merit.com.

Item 1.02 Exhibit

See Item 2.01 of this Form.

Section 2 - Exhibit

Item 2.01 Exhibit

The following report is filed as an exhibit to this Form.

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Dated: May 27, 2016

MERIT MEDICAL SYSTEMS, INC.

By: /s/ Brian G. Lloyd

Chief Legal Officer and Corporate Secretary

**CONFLICT MINERALS REPORT
MERIT MEDICAL SYSTEMS, INC.
YEAR ENDED DECEMBER 31, 2015**

This Conflict Minerals Report (this “**Report**”) for the year ended December 31, 2015 is presented by Merit Medical Systems, Inc. (“**Merit**”) to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the “**Rule**”). The Rule was adopted by the Securities and Exchange Commission (“**SEC**”) to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants whose manufactured products contain conflict minerals which are necessary to the functionality or production of their products. Conflict minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten, and gold (“**3TG**”).

Company Overview

Founded in 1987, Merit set out to build the world’s most customer-focused healthcare company by understanding customers’ needs, and innovating and delivering a diverse range of products that improve the lives of people, families, and communities throughout the world.

Merit’s primary products consist of inflation devices used in angioplasty and stent placement; diagnostic and therapeutic catheters used for various procedures in cardiology and radiology; diagnostic and hydrophilic products used to manage and monitor the administration of contrast media and other fluid solutions; thrombolytic catheters and fluid dispensing systems; embolotherapeutic products for the treatment of uterine fibroids, hypervascularized tumors, and arteriovenous malformations; and procedural trays, packs, and kits.

Merit maintains a diverse, multi-campus manufacturing footprint in North America and Europe with a true global distribution network focused on delivering our products and technologies to our customers

Due Diligence

Merit determined that some of its products were likely to contain 3TG due to the anticipated presence of such minerals in certain products manufactured by or for Merit or in parts or materials obtained from suppliers.

Merit has conducted a good faith and reasonable country of origin inquiry regarding the origin of the 3TG necessary for the functionality or production of products manufactured, or contracted to be manufactured, by or for Merit. The reasonable country of origin inquiry consisted of a survey of supply-chain suppliers of parts or materials necessary for the functionality or production of products manufactured by or for Merit.

Merit utilized the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, to the extent practicable and reasonable given the complexity of Merit’s particular supply chain and industry. Merit sought to identify the

originating smelter or refinery for 3TG in an attempt to discover whether or not the smelter or refinery had been determined to be conflict-free by existing industry and/or trade association programs.

For the 2015 reporting year, Merit surveyed 782 suppliers with a 56% response rate. The response rate was a material improvement over the 2014 reporting year.

Results

Of the suppliers that responded to Merit's survey questionnaire, the vast majority responded that their products, parts, or processes either did not contain 3TG or that any 3TG contained in their products, parts, or processes did not originate in the Democratic Republic of the Congo or adjoining countries. A significant majority of Merit's suppliers that reported the presence of 3TG identified the smelter facilities providing such minerals as being "conflict free," as determined by programs such as the Conflict Free Smelter Program of the Electronic Industry Citizenship Coalition and the Global e-Sustainability Initiative or that the supply of 3TG originated from scrap or recycled sources. A small number of suppliers responded that their smelters confirmed sourcing from the Democratic Republic of Congo or adjoining countries, but these suppliers were unable to confirm that the smelters were compliant. Because not all of Merit's suppliers adequately responded to Merit's multiple inquiries, Merit has been unable to determine the precise origin of some of the 3TG minerals contained in or utilized in the manufacture of such products for the year ended December 31, 2015.

Based on Merit's due diligence efforts, Merit does not have sufficient information to conclusively determine all of the smelters or the countries of origin for the 3TG minerals in all of Merit's products. However, based on the information provided by Merit's suppliers, Appendix I lists the known smelters and Appendix II contains the known countries of origin.

Independent Audit

This Report has not been subject to an independent private sector audit as allowed under the SEC's April 2014 guidance, which was issued in response to pending litigation.

Policies Applicable to Conflict minerals

As part of its due diligence efforts, Merit also has developed a Conflict Minerals Policy (available at <http://www.merit.com/about/conflict-minerals-policy/>) and a Code of Conduct for Suppliers (available at <http://www.merit.com/about/code-of-conduct-for-suppliers/>). These two documents outline the expectations Merit has for its suppliers, as well as steps Merit may choose to take for any non-compliance by its suppliers with the Policy or Code of Conduct.

Steps to be Taken in 2016

Merit plans to continue to improve its due diligence process in 2016 in order to further mitigate the risk addressed by the Rule. These improvements include:

- Continue to strengthen engagement with relevant suppliers.
- Review third party programs to further improve Merit's conflict minerals process and obtain accurate and complete information for smelters.

- Continue to provide feedback to suppliers regarding inadequate reporting or completion of the CMRT assessment.

APPENDIX I
Known Smelters and Locations

Mineral(s)	Smelter or Refiner Name	Country Location of Smelter or Refiner
Gold	Abington Reldan Metals, LLC	Unknown
