Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2024

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, Merit Medical Systems, Inc. (the "Company") is filing a Conflict Minerals Report for the calendar year 2024. A copy of the report is filed as Exhibit 1.01 hereto and is publicly available at <https://www.merit.com/compliance/conflict-minerals-policy/>. The content of any website referred to in this Form SD, including any exhibit hereto, is included for general information only and is not incorporated by reference in this Form SD.

Item 1.02 Exhibit

The Company's Conflict Minerals Report for the calendar year ended December 31, 2024 is filed as Exhibit 1.01 to this Form SD.

Section 2 - Exhibit

Item 2.01 Exhibit

[Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.](#)

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Dated: May 30, 2025

MERIT MEDICAL SYSTEMS, INC.

By: /s/ Brian G. Lloyd

Chief Legal Officer and Corporate Secretary

Merit Medical Systems, Inc.
Conflict Minerals Report
For Calendar Year 2024

Merit Medical Systems, Inc. (“Merit,” the “Company,” “we,” “us,” or “our”) submits this Conflict Minerals Report for the period January 1 to December 31, 2024, pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “Rule”). The Rule was adopted by the Securities and Exchange Commission (the “SEC”) to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants whose manufactured products or products contracted to be manufactured contain conflict minerals which are necessary to the functionality or production of their products. “Conflict minerals” are defined as cassiterite, columbite-tantalite, wolframite and gold, including their derivatives, which are limited to tin, tantalum and tungsten (collectively, “3TG”).

Overview

Merit’s Business

Merit is a leading manufacturer and marketer of proprietary medical devices used in interventional, diagnostic and therapeutic procedures, particularly in cardiology, radiology, oncology, critical care and endoscopy.

Our world headquarters is located in South Jordan, Utah, with our principal office for European operations located in Galway, Ireland and our principal office for Asian distribution located in Beijing, China. We also support our European operations from a distribution and customer service facility located in Maastricht, The Netherlands. In addition, we lease commercial space in India, Hong Kong, Italy, Dubai, Australia, Canada, Brazil, Malaysia, South Korea, Japan, South Africa, Singapore, Great Britain, Vietnam, Taiwan, New Zealand, Indonesia, and France, as well as in California and Texas. Our principal manufacturing and packaging facilities are located in Utah, Virginia, Texas, Florida, Ireland, Brazil, Singapore, Mexico, France and The Netherlands. Our research and development activities are conducted principally at facilities located in Utah, California, Texas, Ireland and France.

We design, develop, market and manufacture, through our own operations and contract manufacturers, medical products that offer a high level of quality, value and safety to our customers, as well as the patients they serve. Our products are used in the following clinical areas: radiology; diagnostic and interventional cardiology; interventional radiology; neurointerventional radiology; vascular, general and thoracic surgery; electrophysiology; cardiac rhythm management; interventional pulmonology; interventional nephrology; orthopedic spine surgery; interventional oncology; pain management; breast cancer surgery, outpatient access centers; intensive care; imaging; and interventional gastroenterology. These products are collectively referred to as “Covered Products”.

Reasonable Country of Origin Inquiry

We have reviewed internal product information and conducted a survey of suppliers of metal parts for the Covered Products. Based on inquiries to suppliers of components and subassemblies within the Covered Products, we have determined that 3TG are necessary to the functionality or production of certain of the Covered Products manufactured or contracted to manufacturing during calendar year 2024. Accordingly, the Company conducted in good faith a reasonable country of origin inquiry (the "RCOI") to determine whether any 3TG contained in the Covered Products originated in the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and or Angola (together the "Covered Countries").

The elements of the RCOI were: identification of the relevant suppliers; data collection; and assessment to determine whether further due diligence was required.

- Identification of the suppliers: We initially identified 37 suppliers that may have provided 3TG used in the Covered Products (the "Supplier Group").
 - Data Collection: We distributed information to the Supplier Group about the Rule and requested information regarding the source of 3TG contained in the components and subassemblies supplied to manufacture the Covered Products. We sent the Supplier Group the Conflict Minerals Reporting Template (the "CMRT") developed by the Responsible Minerals Initiative (the "RMI"). The CMRT is designed to obtain sourcing information on the 3TG contained in materials manufactured or supplied by the Supplier Group used in the Covered Products, or as a company-level declaration, including information on the type of 3TG involved, the source and country of origin of the 3TG, as well as the smelters and refiners of those 3TG. We reviewed responses to the CMRT for plausibility, consistency, and completeness. We also reviewed smelters or refiners reported on responses to the CMRT against the Responsible Minerals Assurance Process ("RMAP")-Active database that contains all of the smelters or refiners that are under the RMI RMAP-Active Program. For smelters or refiners that could not be identified against the RMAP-Active database, we checked the smelter against the Covered Countries list. Of the 37 entities identified in the Supplier Group, we received completed CMRT responses from more than 90% of the entities.
 - Assessment: Based on the RCOI, the Company has reason to believe that some 3TG used in the Covered Products may have originated in the Covered Countries. Accordingly, we conducted further due diligence on the source and chain of custody of 3TG contained in components and subassemblies provided by the Supplier Group.
-

Due Diligence Process

Design of Due Diligence Measures

Our due diligence measures have been designed to conform, in all material aspects, with the Organization for Economic Co-operation and Development's "Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.

Due Diligence Performed

Step 1: Establish Strong Company Management Systems

The Company has established a management system to determine the source and chain of custody of 3TG in our supply chain, including the following key components:

Conflict Minerals Policy. We have adopted a Conflict Minerals Policy that outlines to suppliers and customers our commitment to responsible sourcing of 3TG throughout our supply chain and to compliance with the Rule. The Conflict Minerals Policy is publicly available on our website at: <https://www.merit.com/compliance/conflict-minerals-policy/>

Internal Team. Our management system includes oversight of our RCOI and due diligence processes by a team made up of representatives from various departments within the Company, such as Operations (which includes members from our manufacturing and procurement functions), Environment, Social and Governance, and Legal. The team is responsible for assessing any risks that may exist in our supply chain. Our Vice President, Environment, Social and Governance ("ESG"), oversees the work of our 3TG compliance team.

Control Systems. We utilize the CMRT sent to the Supplier Group to gather information on the chain of custody of 3TG included in the Covered Products.

Supplier Engagement. Our Vice President, Global Strategic Sourcing, has communicated to the Supplier Group our obligations under the Rule by distributing to them the CMRT and providing them with information on compliance with the Rule.

Grievance Mechanism. We have a company level grievance mechanism as part of our Code of Conduct for Suppliers and Code of Conduct for Employees, as well as an ethics hotline hosted by a third party that provides both internal and external stakeholders with a mechanism to report violations of our policies or other concerns. We have procedures in place for follow-up in the event any conflict minerals issues are raised through our grievance mechanism.

Record retention. We have a record retention policy applicable to conflict minerals-related documentation.

Step 2: Identify and Assess Risk in the Supply Chain

Distribution of CMRT to Supplier Group. In 2024, Our Vice President, Global Strategic Sourcing, distributed the CMRT to the Supplier Group to gather information on our supply chain, including (i) whether any of the minerals which could potentially be classified as 3TG are contained in materials the Supplier Group supplied to Merit or its contract manufacturers and (ii) whether those minerals originated from the Covered Countries.

Assessment of Supplier Group Responses. Of the relevant entities comprising the Supplier Group, we received fully completed CMRT responses from more than 90% of the group. We reviewed each response to assess the adequacy of such response. Suppliers that initially failed to respond to the CMRT or that did not provide responses to all applicable questions in the CMRT received follow-up communications from the Company requesting additional information. If supplier responses indicated that 3TG contained in components and subassemblies for the Covered Products may have originated from the Covered Countries and are not conformant to the RMI RMAP (or a cross-recognized program), then such responses were reviewed by the Company and reported to our Strategic Global Sourcing department for further review and determination of follow-up actions.

Step 3: Design and Implement a Strategy to Respond to Identified Risks

We work to implement a risk management plan to address concerns that a supplier may be providing 3TG sourced from the Covered Countries for the production of the Covered Products. If a supplier indicates that its products may contain 3TG sourced from the Covered Countries, we will follow up with the supplier to gather more information, including the basis for the information provided and other information regarding the sourcing country and smelter or refiner. Identified risks will be reported to the Vice President, Environment, Social and Governance, who will determine appropriate follow-up actions, if any, to mitigate risks.

Step 4: Report on Supply Chain Due Diligence

This report will be filed with the SEC and be publicly available at: <https://www.merit.com/compliance/conflict-minerals-report/>. The reference to the Company's website is provided for convenience only, and its contents are neither incorporated by reference into this report nor deemed filed with the SEC.

Due Diligence Results

Based on information from completed responses to the CMRT, we identified 489 unique smelters or refiners used by the Supplier Group that may have been used to process 3TG in the Covered Products. Because many of the supplier responses to the CMRT are company-wide and not specific to the manufacture of the products they supplied to us, the information provided on smelters or refiners may include facilities that do not provide materials that are used in our products. Due to many of the CMRT responses from the Supplier Group containing information on their company-wide operations (and not specific to the manufacture of our products) and due to the multiple levels of suppliers in our supply chain, we are unable to determine with certainty at this time which smelters or refiners or which countries of origin listed in the responses to the CMRT actually provided the specific 3TG used in our Covered Products. Accordingly, as of this reporting period, the Company does not know all the facilities used to process the 3TG used in our Covered Products, or the country of origin of all the 3TG used in our Covered Products.

Steps to be Taken to Mitigate Risk

We intend to take the following steps to improve the due diligence conducted and to further mitigate any future risk of sourcing 3TG that benefit armed groups in the Covered Countries:

1. Continue to work closely with the Supplier Group to obtain the necessary information on the origin of 3TG contained in the materials or components used in the Covered Products and continue to refine our applicability assessment process.
2. Monitor and encourage the continuing development and progress of traceability measures of the suppliers within the Supplier Group that indicated that the source of 3TG was unknown or not determined.
3. Engage suppliers to request smelters or refiners who do not participate in the RMI RMAP (or a cross-recognized program) to participate, or to work to transition away from such smelters or refiners.

Cautionary Statement about Forward-Looking Statements

This report contains "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are those that address activities, events or developments that we or our management intends, expects, projects, believes or anticipates will or may occur in the future. They are based on management's assumptions and assessments in the light of past experience and trends, current economic and industry conditions, expected future developments and other relevant factors. They are not guarantees of future performance, and actual results, developments and business decisions may differ from those envisaged by our forward-looking statements. Our forward-looking statements are also subject to risks and uncertainties, which can affect our performance in both the near and long term. These forward-looking statements should be considered in the light of the information included in this report and our other filings with the SEC, including, without limitation, the "Risk Factors" as well as the description of trends and other factors in "Management's Discussion and Analysis of Financial Condition and Results of Operations" set forth in our Annual Report on Form 10-K for the year ended December 31, 2024, our Quarterly Report on Form 10-Q for the quarter ended March 31, 2025 and our other filings with the SEC.
